

AINSE will be offering travel subsidy to AINSE researchers at member institutions who are presenting a paper at the **International Congress of Radiation Research (ICRR 2011)** in Warsaw. If you are intending to submit an abstract for this conference you should advise AINSE by 15 May. This will enable AINSE to calculate the likely amount of the subsidies.

When you receive notification that your paper has been accepted, you should forward the notification to AINSE along with a request for support.

Preference will be given to research students and young career researchers.
